

Forma de pago nueva Stripe

Stripe

Configura Stripe en 2 pasos:

1. In Stripe Dashboard > Developers > Webhooks, create an endpoint with this URL:
2. Set allowed payment methods per country in STRIPE_METHODS_BY_COUNTRY.

`https://base.sakaprint.eu/payment/payment-confirmation?type=11`

Example for STRIPE_METHODS_BY_COUNTRY:

```
{ "default": [ "card" ], "1": [ "card", "bizum" ] }
```

Use internal country_id values (for example Settings > Locations > Countries). "default" applies when no country-specific rule exists.

STRIPE SECRET KEY (TEST)

Secret API key used in Stripe test mode.

STRIPE SECRET KEY

Secret API key used in Stripe production mode.

STRIPE PUBLISHABLE KEY (TEST)

Publishable key used in Stripe test mode.

STRIPE PUBLISHABLE KEY
