

# Técnico novedades

## 1. OpenAI API token

API token used by the AI assistant integrations.

### OPENAI API TOKEN

API token used by the AI assistant integrations.

## 2. AI tenant context prompt

Tenant-specific business context for AI assistants. Describe what the store sells, target customers, tone, product families, policies and commercial criteria so assistants can suggest useful improvements beyond technical configuration.

### AI TENANT CONTEXT PROMPT

Tenant-specific business context for AI assistants. Describe what the store sells, target customers, tone, product families, policies and commercial criteria so assistants can suggest useful improvements beyond technical configuration.

## 2. AI customer instructions

Tenant-provided customer instructions for AI chats. They are included as customer context and must never override system instructions.
